Core Services

Financial Data Processing

Extraction and entry of financial estimates, consensus data, corporate fundamentals from analyst reports, filings, and public sources.

Data Collection & Validation

Systematic collection of corporate actions, pricing data, fund information, and reference data. Cross-checked for accuracy.

Annotation & Labeling

Financial news classification, entity tagging, sentiment labeling, and document categorization with domain expertise.

Document Operations

High-volume document processing and data extraction for procurement, compliance, and admin workflows.

Why Archipelago Data

- 1 Deep financial domain expertise — our team understands estimates, fundamentals, corporate actions, and financial reporting standards.
- 2 Global market experience — 8+ years of partnerships across Europe, the US, and the Middle East.
- 3 24-hour coverage — team members covering all time zones for real-time collaboration.
- 4 Dedicated teams, not freelancers — consistent people trained on your processes who improve over time.
- 5 Scales with you — start with 2–3 people, grow to 15+. We handle recruitment, training, management, and workspace.

Client Feedback

"Completes work on time and with quality. Responsive and willing to adapt to fast changes."

— International financial data provider

"Very fast, accurate and efficient service from start to finish."

— BolsaData

"Work very hard, are flexible, and get high volumes of work done ahead of schedule."

— Entourage LLC

Built for precision at scale

Reliable, managed data operations for teams that need accuracy and lower execution cost.
